laboratorieudstyr kan købes.

Transskription

Glasgow, 1st Dec 1884

Emil Chr. Hansen Esq
Carlsberg. Copenhagen

Dear Sir.

I had the pleasure of writing on 14 Nov as copy on other
side but fear it may have gone astray owing to Copenhagen not being
on address.

I am yours truly
Walter Arrol

Emil Chr. Hansen Esq
Carlsberg.

Dear Sir.

I have read with much pleasure your work on Alcoholic
Ferments and feel much interested in the particulars you bring forcibly
to the front. Kindly let me know what size of bulb (Pasteur) you would
recommend for experimental [blyantsnote: 1/8 – 1/1 liter] purposes
and what size for practical working, that is to grow yeast for starting
the fermentation in beer wort say for 80 to 100 barrels at a time,
please let me know where the square glasses “avec petits carres” are
to be obtained as also the “chambre humid de Bottcher” and for
Pasteurs bulbs both sizes who are the best makers. Please,
thanking you in anticipation for the information now asked.
